

## Fondabee® & Invertbee®

---

Belgosuc have developed natural beefeed based on sugar and glucose, fully in line with the sugar spectrum of the natural feed of the bees, honey, which makes Belgosuc befeed the perfect alternative to feed your bees in a healthy way.

Their ready-to-use packaging enables both the hobby beekeeper and the professional beekeeper to easily feed their bees. With 25 years of experience in the development of befeed and approved by the Belgian Agency of Food and Feed, Belgosuc is active in whole Europe and Canada with its befeed range

Belgosuc befeed paste Fondabee® is perfect for feeding during fall and winter time, both as regular feed or emergency feed.

- Fondant paste with a lab controlled sugar spectrum on sucrose, dextrose, fructose, maltose and higher sugars offering an optimal sugar balance.
- SO<sub>2</sub> level lower than 10 ppm
- HMF level in Fondabee® < 20 ppm
- (HMF = hydroxymethyl furfural, which is toxic for bees)
- No traces of Neonicotinoids in Fondabee®

Liquid befeed syrup Invertbee® is a perfect alternative for feeding in the spring, when the bees start flying out and to give them an extra "boost". They'll get thirsty and fly out, looking for water. The Invertbee® liquid befeed can also be used during the rest of the year as the syrups do not crystallize and have a long shelf life. Invertbee® can also be supplied in IBCs upon request.

- Perfectly suited enzymatically mixed syrup for complimentary feeding
- Invertbee®: mixed syrup based on sugars from beet mainly (<30 ppm HMF)
- Invertbee® is the perfect befeed for Autumn and Winter
- No traces of Neonicotinoids in Invertbee®

### Product Info

Fondabee® Pack size  
5x2.5kg - Code F0132

Fondabee® Palletisation  
5x2.5kg x 70

Invertbee® Pack size  
14kg - Code F0130

Invertbee® Palletisation  
14kg x 60

### Storage

Store in dry, ambient conditions
